

IT PROVIDER MANAGEMENT FUNDAMENTALS

Course overview

Many IT outsourcing projects fail in achieving the desired goals, e.g. reducing IT costs or increasing flexibility. In addition to unclear contractual agreements, the main reason for this is that companies are underestimating the required provider management during operations: Only a few companies monitor and control their external IT service providers efficiently. Within this seminar all aspects and prerequisites will be presented which are needed to set up an efficient provider management and a successful cooperation with service providers.

Your Benefits

... you will get

- an overview of all relevant tasks,
- insights into options of organisational integration,
- tips for an efficient provider management, especially in multi-provider environments,

... you will learn

- which 9 dimensions have to be taken into account when building up an efficient provider management,
- which basic conditions, methods and organisation are necessary for a successful cooperation,
- how to design them efficiently, how to avoid friction losses and how to achieve your goals.

Who should attend

- IT Managers, IT Service Managers, IT Operations Managers, IT Service Providers
- Employees involved in IT outsourcing projects
